

Clamping ring machine

A clamping ring machine is a system for the automatic production of clamping rings. **schmale Maschinenbau GmbH** is one of the leading manufacturers of automatic clamping ring machines in Germany.

Our clamping ring machines profile, bend and cut the strip material. Closures are automatically fed and welded on. The finished clamping ring is calibrated and deposited. All processing stations are connected to each other via a servo-electric transfer and are operated simultaneously. /Cycle rates of up to 28 clamping rings per minute can therefore be achieved.

Our clamping ring machines can be equipped with different tool sets and, after a brief changeover, they can produce clamping rings with different diameters.
